

MV-HEADSETS™

EVERY CONDITION. ANY SOUND™

SOUND CHECK

MV-HEADSETS are optimized to work with Wireless Mesh-Network Intercoms™ from MULTIVOICE™ in any and all conditions. Built to military-grade specifications, our headsets will *withstand anything you can withstand* and deliver excellent protection and ensure crystal clear communication everywhere; from firefights to flight lines and from raucous stadiums to blaring production lines.

ALL-AROUND PROTECTION

If regulations require dual-ear protection, we've got you covered. Or if situational awareness is critical (a preference among many Football coaches), we offer single-ear solutions too.

If you need a headset to fit comfortably under a hardhat or helmet, try the Profile brand headset with its adjustable over-the-head strap. Conversely, for something a little more discreet and lightweight, one of our Hurricane headsets may be just the right the solution for you.

Whatever storms you face, MV-HEADSETS are sure to provide the protection and functionality you need to *get your job done right*.

MV-HEADSETS™

EVERY CONDITION. ANY SOUND™

HEAVY DUTY

Heavy Duty brand headsets are certified to Military Specifications and designed to defeat even the loudest and worst environments. They feature a padded over-the-head strap, as well as cloth-covered ear seals, to provide supreme comfort. The flexible, noise-canceling microphone can easily be adjusted from left to right making this headset the perfect combination of comfort, reliability and protection. (Available in double- or single-ear mode.)

- Mil-Spec certified
- Flexible, noise-canceling boom microphone
- Certified noise reduction rating: 24dB
- Operating temperature: -22°—167° F

PROFILE

Profile brand modular headsets deliver protection and comfort in high-noise environments. With an adjustable, over-the-head mesh strap, a behind-the-head suspension system, and soft foam and gel ear seals, professionals will find Profile headsets to be a comfortable—with or without a hardhat or helmet.

- Flexible, noise-canceling boom microphone
- Immersion rating: up to 1 meter for 30 minutes
- Certified noise reduction rating: 21dB
- Operating temperature: -22°—167° F

HURRICANE

Hurricane II headsets deliver MULTIVOICE's most discreet and lightweight headset solutions with the performance of a heavy-duty headset, but without all the weight and bulk. The Hurricane features a comfortable behind-the-head frame with noise-reducing ear tips and a noise-canceling boom microphone. (SureFire® Noise-Reducing Filters optional.)

- NoisEZ® Ear Tips noise reduction: 29dB
- Flexible, noise-canceling boom microphone (sensitivity at 94dB SPL)
- Easily convertible from high noise to low noise environments
- Operating temperature: -4°—140° F
